Log In to your OGM account using your email address & password & set the OS to "Server". Remove OGM JAF PKEY Emulator v 5\_Appupro.exe The same version of the JAF can be also be Downloaded from here for Linux.Q: How to get unique records from table by their values of one or more fields? I have a MySQL DB table called 'gallery' which has the following structure: +-----+-----+-----+ | id | gallery\_name | gallery\_image | +-----+-----+-----+ | 1 | Front page | 1.jpg | | 2 | Guest post | 2.jpg | | 3 | Press release | 3.jpg | +-----+-----+-----+ As you can see the table has three rows. Now I would like to get only the unique values of gallery\_name, which is Front page, Press release, Guest post. How can I do that? A: Your question is rather confused, but it appears you just want a list of all unique gallery\_name values. If that's the case, you can use GROUP\_CONCAT to concatenate your gallery\_name values into a single string and use MySQL's in built RLIKE function to filter out any duplicates: SELECT gallery\_name FROM your\_table GROUP BY gallery\_name HAVING (COUNT(\*) > 1) If there's a chance of more than one value per name, then you'll need to get a bit more creative. Here's a method that should work regardless. WITH cte AS ( SELECT \*, ROW\_NUMBER() OVER (PART

A: I resolved your error. Try this please: 1- Download OGM-JAF.zip from here 2- Install jaf and jaf\_drivers.exe 3- Delete ogm jaf emulator from path Rgds, A: You shouldn't put any further files into C:\Program Files\ODEONJAF. Next, you should check your install path and put the jaf drivers and the jaf emulator with its related files into C:\Program Files\ODEONJAF. Kowalski, W. Brauns, S. Thoms, R. Krieg, J. R.
